

Game Assembly: Cut extra strip off one side of the game board, then line up carefully and glue to the other half of the game board. Provide children with game markers, a pencil and a paperclip as a spinner.

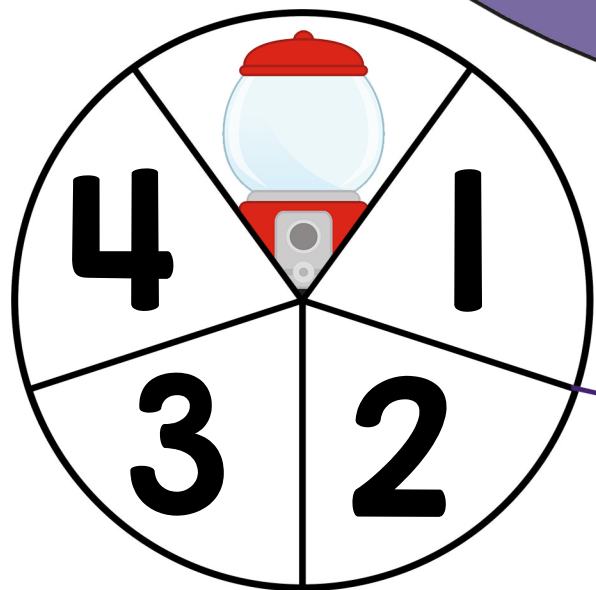

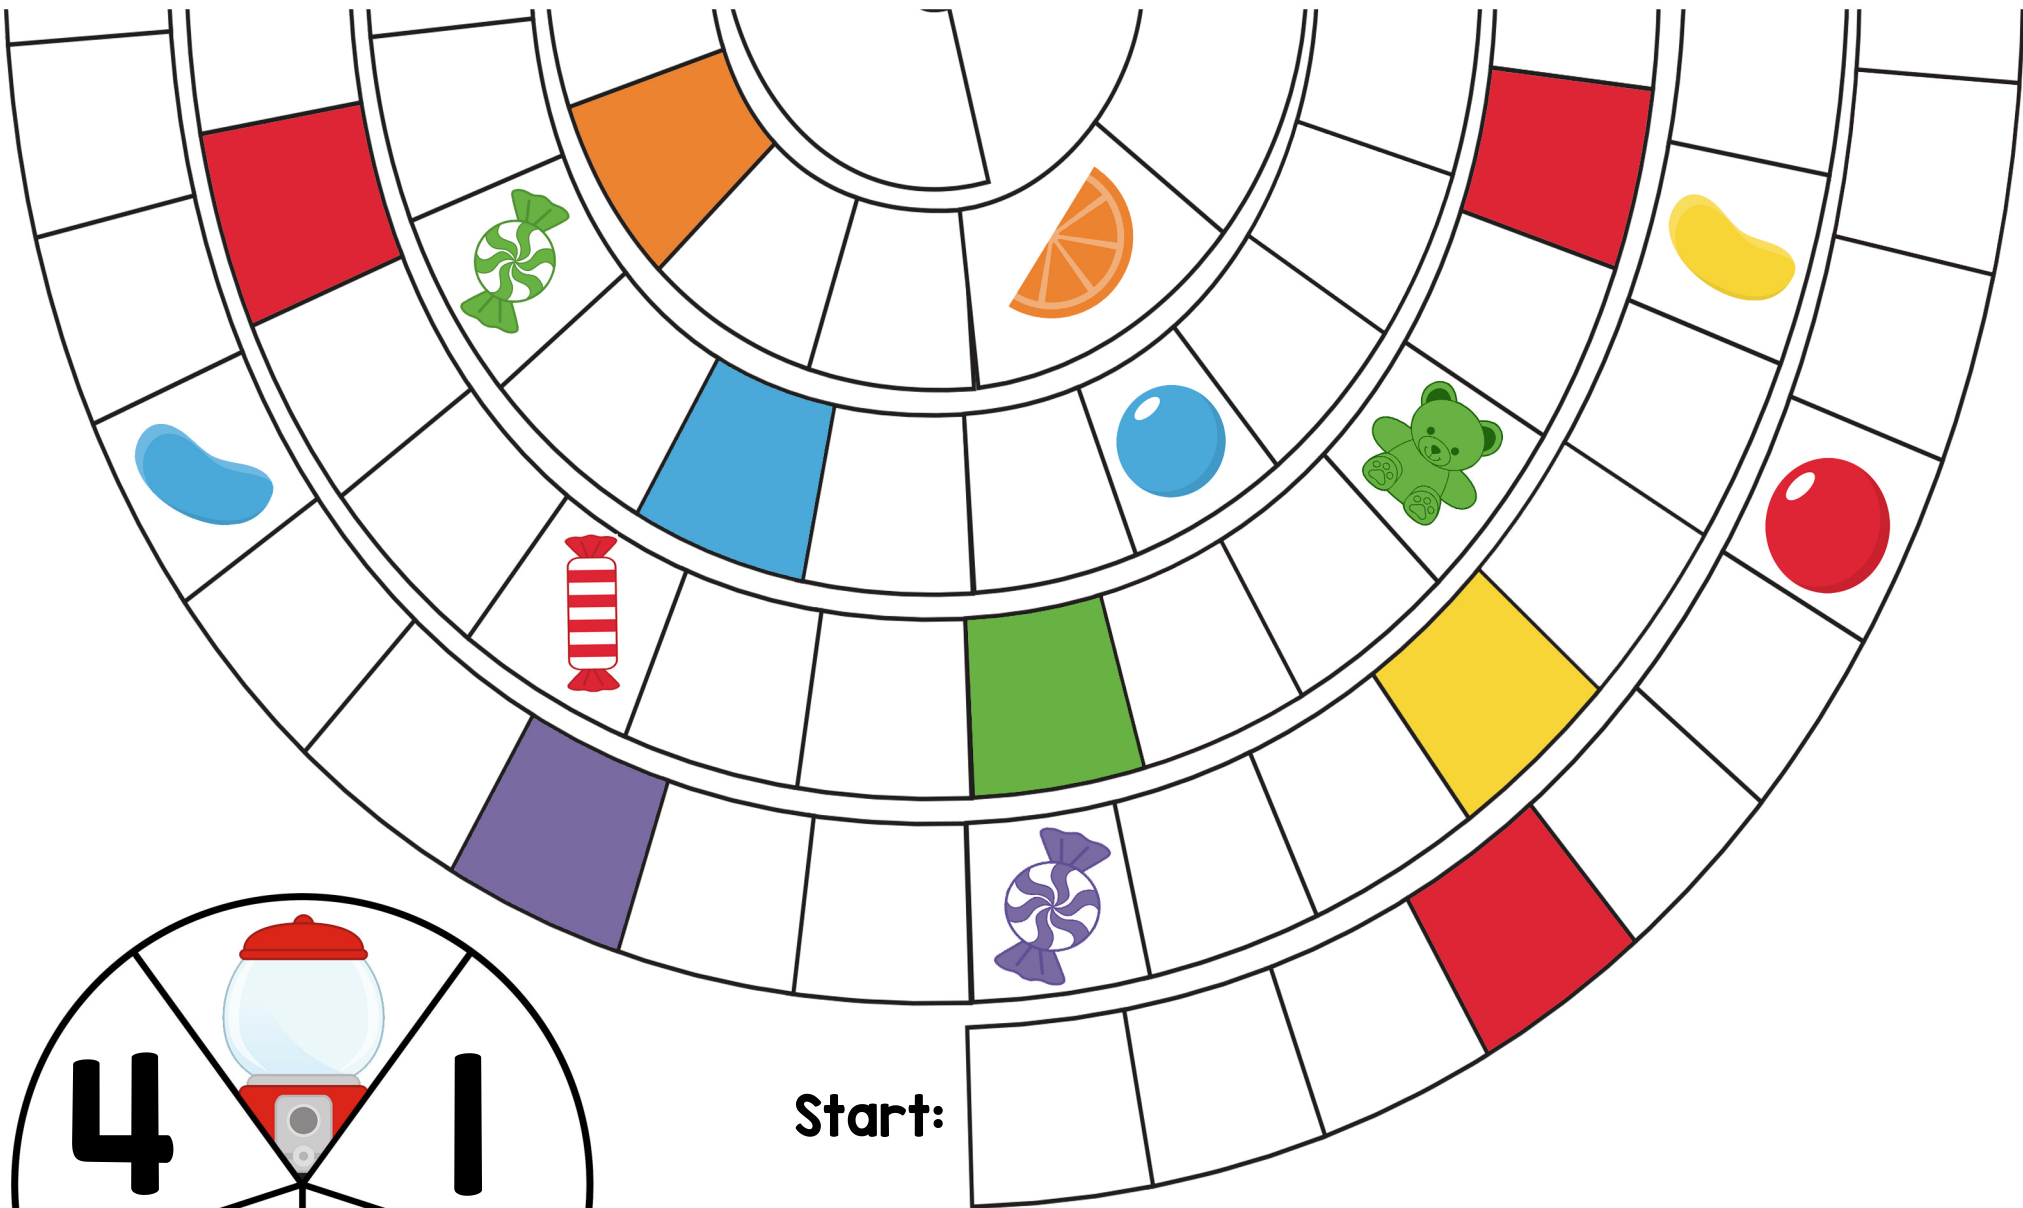

Game Play: On your turn spin two times adding the spins together to make your move. If you land on the gumball machine you automatically advance to the next candy square. If you land on a colored square you get to move up to the next candy square. First to the end wins!

TIP: Save this game for older children and use with multiplication instead of addition.
